

ezTOOLS™ | UniShaver Ribbon Midspan Access Tool

Ribbon Tube Midspan Access Tool (4.3 to 14.0 mm)

Product Snapshot

Applications

Opens the tubes in Ribbon fiber optic cable / Reliable Midspan entry to fiber Ribbons

Cable Types

ezRIBBON™ | Central Loose Tube & Loose Tube Ribbon / ezUNITUBE™

Tool Type

One Hand Operation/Shaving Action (4.3 to 14.0 mm)

Options

Inserts to Fit a Variety of Tube Sizes from 4.3 to 14.0 mm

The simplest and most reliable midspan access tool for ribbon and central buffer tubes.

Draka's Ribbon Central Tube Unishaver provides quick and easy midspan access to ribbons (ezRIBBON) central tube and fibers (ezUNITUBE) every time. This specially designed tool holds the buffer tube firmly in place where a precision blade "shaves" only the tube wall, providing access to ribbon fibers without damage to the fiber or coating. The new kit comes with the shell and a choice of inserts for various size tube diameters. Inserts are color coded and engraved to make easy selection of the right insert for the job.

The Draka UniShaver Tool is designed to open tubes greater than 4.3 mm (0.17 inches) diameter, and is typically used with Central Tube Ribbon, Loose Tube Ribbon, and other Central Tube cables. Select the correct tool size, open the palm-size holder, calibrate the blade depth, and go.

Features & Benefits

Reliable Tube Access

- Reliable and repeatable access to fibers without damage
- Lab tested & field proven
- Easy and infrequent calibration
- Rugged and built to last

Simple & Flexible Support of Multiple Tube Sizes

- Inserts Available for tube sizes 4.3 to 14.0 mm
- Inserts fit into a common size shell
- Cleaner midspan access
