

ezTOOLS™ | Buffer Tube Midspan Access Tool

Buffer Tube Midspan Access Tool (1.5 to 4.3 mm)

Product Snapshot

Applications

Reliable midspan entry to access fibers in loose tube cables. Easy change inserts for a variety of manufacturers tube sizes.

Cable Types

Loose Tube, ADSS, Microduct & Specialty

Tool Type

One Hand Operation / Shaving Action / Quick Change Inserts / Rugged

Options

Kit (1 tool, 3 inserts, accessories) / Inserts (12) to fit a Variety of Buffer Tube Sizes

The simplest and most reliable midspan access tool for loose buffer tubes.

Draka's ezACCESS | Buffer Tube Access Tool provides quick and easy access to fibers every time. Designed for midspan entry in buffer tubes to access fibers, this is the one-stop tool for the veteran or the new installer. Specially designed inserts hold the buffer tube firmly in place where a precision-ground blade "shaves" only the tube wall - providing reliable access without damage to the fiber or coating. An industry study revealed that Draka's ezACCESS Buffer Tube Access tool provides the most consistent, safe and reliable access while other tools frequently damaged fibers and / or coatings.

Interchangeable labeled inserts support a wide variety of buffer tubes sizes used for different fiber counts and cable designs. The tool's thick gauge steel alloy construction and a hard shell tote case mean years of reliable field use. These interchangeable inserts change in and out within 15 seconds.

Features & Benefits

Reliable Tube Access

- Reliable and repeatable access to fibers without damage
- Lab tested & field proven
- No calibration required
- Rugged and built to last

Simple & Flexible Support of Multiple Size Buffer Tubes

- Multi-purpose tool supports up to 12 insert sizes
- 15 second change out of inserts
- Cleaner midspan access
